Local 282: Damages Non-Dura Summary in Fitbit Inc.
Class Period: June 18, 2015 to January 6, 2016

Class Period Purchases	Purchase Expenditures	Class Period Sales	Class Period Proceeds	Shares Retained	Value of Retained Shares*	Damages

* Pursuant to 15 U.S.C. § 78u-4, shares held 90 days following the end of the Class Period are valued at the average closing price during the 90 days following the close of the class period. As 90 days have not yet passed, the shares were valued at the average closing price between January 7, 2016 and March 10, 2016 -- \$15.68.

* Distinctions between FIFO / LIFO matching of sales to purchases are not relevant to calculations because the class period begins with Fitbit's IPO. Therefore none of the movants have pre-class period holdings.

* Non-Dura Damages are calculated by calculating the class period expenditures and subtracting the class period sales (not applicable to this movant), post class period sales (also not applicable to this movant) and the PSLRA average value of retained shares. Shares sold in the 90 days after the class period are valued at the higher of the sale price and the average closing price from the end of the class period through the sale date. Local 282 has no such sales to date.
